

Built to one *standard*.

Every TaliWood kitchen is built to one standard, on every cabinet: a solid-wood face frame on a full-plywood box, with precision five-piece doors, dovetail drawers, and soft-close hardware throughout. The detail of a custom shop, at a price only a vertically integrated maker can deliver.

THE EIGHT QUALITY MARKS

- 1 Solid-wood face frames** Furniture-grade solid-wood face frames, paired with precision-milled five-piece doors. Never foil, never thermofoil.
- 2 1/2" plywood box** Full-plywood carcass with a full 1/2" plywood back, exterior-finished on every side.
- 3 3/4" adjustable shelf** Edge-banded plywood, 15" deep, on side-set metal pins.
- 4 Dovetail drawer** 5/8" solid-hardwood box, 3/8" plywood bottom.
- 5 Undermount glides** Full-extension, soft-close, concealed under the box.
- 6 6-way soft-close hinge** Concealed, fully adjustable at install.
- 7 Acid-catalyzed finish** A hard, hand-finished acid-catalyzed topcoat that wipes clean and wears like furniture.
- 8 Integrated toe-kick** A clean, finished toe-kick built into the cabinet for a seamless base.

EMISSIONS & COMPLIANCE

CARB PHASE 2

TSCA TITLE VI

BUILT TO KCMA A161.1

AMERICAN-OWNED

Every TaliWood line meets CARB Phase 2 and TSCA Title VI, the federal U.S. benchmarks for indoor-air formaldehyde emissions. TaliWood construction is engineered to meet or exceed the ANSI/KCMA A161.1 cabinet standard. Blum soft-close hinges and glides are available as an upgrade on any plywood line.

STANDARD CABINET DIMENSIONS

BASE

9"–42" W

34.5" H · 24" D. 3" width increments.

WALL

12"–48" H

9"–42" W · 12" D. Heights to suit 8'–10' ceilings.

TALL / PANTRY

84"–96" H

18", 24" & 30" W · 24" D. Base, wall, corner & specialty across every line.

THE KITCHEN FINISH PALETTE

Glacier

cool white

Pearl

Harvest

warm wood

Nightfall

matte black

Finish availability varies by kitchen collection: Nightfall is reserved for Chic. All finishes are digitally matched to a defined standard with exacting tolerance. Swatches shown are representative; specify from a physical dealer sample. Bathroom vanities carry their own finish palette, shown on the vanities sheet.

THE FLAGSHIP LINE

Forte. *The shaker, refined.*

The shaker, done right and done at scale. A classic shaker face on a full-plywood box, with dovetail drawers and 6-way adjustable soft-close hinges throughout. The line that anchors more TaliWood kitchens than any other.

THE SLIM SHAKER

Chic. *Shaker, quieter.*

Chic shares Forte's plywood box and hardware, with a solid-wood frame and a precision-milled center engineered to hold its line through the seasons. Tighter proportions, a quieter reveal, equally at home in a spare modern kitchen or layered into a classic one.

- FULL PLYWOOD
- SLIM SHAKER
- FULL OVERLAY

AVAILABLE FINISH

Glacier
cool white

A single, project-ready finish keeps the program fast and consistent across large unit counts.

BEST FOR

Multi-family, student housing, and rental, where budget certainty and schedule matter most. Engineered for projects that leave no margin for surprises.

HOW IT DIFFERS

Builders trades the solid-wood face frames and full-plywood box of Forte and Chic for all-engineered MDF furniture-board construction with a melamine interior. Purpose-built for volume, not for the showroom floor.

Engineered MDF FURNITURE BOARD	Melamine WIPE-CLEAN INTERIOR	CARB 2 EMISSIONS COMPLIANT	Per Project BUILT TO SCOPE
-----------------------------------	---------------------------------	-------------------------------	-------------------------------

Three doors. *One platform.*

Forte and Chic share the same full-plywood box, dovetail drawers, and soft-close hardware; they differ in the door and the finish range. Builders is a separate program, engineered for volume.

The plywood lines (Forte and Chic) are engineered to meet or exceed the ANSI/KCMA A161.1 cabinet standard. Blum soft-close hinges and glides are available as an upgrade on any plywood line.

LIMITED LIFETIME WARRANTY

TaliWood warrants its cabinetry against defects in materials and workmanship, to the original purchaser, for as long as they own the home. The warranty is non-transferable.

Excludes normal wear, natural variation in wood grain and color, damage from improper handling, assembly, installation, humidity or misuse, and all labor, removal, and transportation costs. Remedy is repair, replacement, or credit at TaliWood's discretion. Claims begin with your dealer.

SOHO	Modern drawer · special order	30-60"	Clean lines, generous soft-close drawers

Langmore is a stocked line. Malibu and Soho are special order, built to your project.

THE EZ CLICK READY-TO-ASSEMBLE SYSTEM

Clicks together. *No power tools.*

EZ Click is TaliWood's ready-to-assemble line, built on a licensed click-together architecture. A flexible insert locks into the premium plywood box to form a joint stronger than traditional fasteners, and goes together in a fraction of the time of conventional RTA.

5× FASTER THAN COMPETING RTA	0 NAILS · GLUE · DOWELS	100% TOOLLESS BOX ASSEMBLY	Plywood PREMIUM BOX CONSTRUCTION
--	-----------------------------------	--------------------------------------	--

HOW THE SYSTEM WORKS

ARCHITECTURE	Licensed click-together assembly system
CONNECTION	Flexible insert bonds with the plywood panel for a fastener-free, high-strength joint
BOX	Premium plywood construction
ASSEMBLY	100% toolless box assembly. No nails, glue, dowels, or power tools.
SPEED	Up to 5× faster than conventional RTA systems
DOORS	Same TaliWood door styles and finishes; door hardware installs with a screwdriver

WHY IT MATTERS

RTA cabinets ship flat, so they cost less to freight and store, and they clear tight jobsite and elevator access where assembled boxes cannot. EZ Click keeps the ready-to-assemble economics while removing the slow, error-prone part: the box goes together by hand, square and solid, in a fraction of the time.

FLAT-PACK FREIGHT

TIGHT-ACCESS READY

CARB 2 · TSCA VI

A LINE WITHIN TALIWOOD

EZ Click is one product line within the TaliWood family, engineered to the same construction standard as our assembled cabinetry. Assembled and RTA are two ways to buy the same quality.
